HODGSON CAMP HOUSES

THESE Camp Houses have been on the market for over forty years. They have an established reputation for durability and stability.

Our system of units makes it possible to easily and quickly erect a one room camp in an hour's time, and the largest one in a day or two, without fuss or muss; also to as quickly and easily add rooms at any time.

These houses are used for cottages, vacation houses, both summer and winter; school camps; overnight camps; guest or overflow houses; for many uses in large camps where small buildings are needed; also for play houses, skating houses, rest houses, storage houses, garages, etc.

There are many interesting facts in the following pages. It will be well worth your while to read this booklet thoroughly.

The prices are on a price list sheet in the back of the catalog.

Hodgson Camp Houses

THE smallest camp house generally consists of one room and a porch; although the 10 x 10 ft. room only can be purchased and other rooms or porches can be added later. The list below will show the units, etc., used in this house.

Itemized List—Plan 1

- | | |
|------------------------------|------------------|
| 1—10 x 10 ft. Unit with ends | 2—pairs Shutters |
| 1—5 x 10 ft. End Porch | 1—Door |
| 2—Casement Windows | 2—Flower Boxes |

Plan 1

NOTE: Any of the above items may be eliminated; or you can add more if desired. Read pages 12-13.

This camp is shown in its natural color, which is cedar, oiled (not painted). Furnishings, see pages 14 to 18.

PLAN 2

THIS camp house is similar to Plan 1 above except that it has a side porch in place of the end porch.

Plan 2

Hodgson Camp House Plan 3—Price in back of catalog

Hodgson Camp House

THIS camp has two 10 x 10 foot rooms and a side porch, with windows and two outside doors, so either room can be entered from the porch—very convenient when you wish to entirely separate the rooms. More or fewer doors or windows can be used, thus changing the price accordingly. The picture shows the house oiled.

Itemized List—Plan 3

- | | |
|------------------------------|-------------------------|
| 1-10 x 10 ft. Unit with ends | 1-4 x 10 ft. Side Porch |
| 1-10 x 10 ft. Addition | 4-Casement Windows |
| 1-Partition | 4-pairs Shutters |
| 1-Partiton Peak | 3-Doors |

NOTE: If flower boxes are wanted, add \$1.50 per box.

These houses are oiled only—not painted. Read pages 12-13.

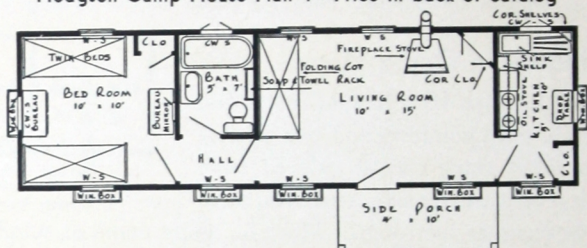

North Haven, Mass., Pulpit Harbor

"Five years ago I bought from you rather a large Hodgson home of seven rooms. This summer we have come back to it and it will please you to learn that we find it in perfect condition, no leaks, no warping, everything snug and tight, as good as new. Two years ago we had the house oiled on the outside, but otherwise no special care has been taken of it. I am very much pleased and compliment you on your honest workmanship."

MOOSEHEAD LAKE 18 YEARS

"I would like to say that the first Hodgson Houses I bought (it must be 17 or 18 years ago) are in just as good condition as when they were first put up. They have been here on Farm Island during the severe Maine winters.

"I was pleased to see the letter my son-in-law (Mr. John McEntee Bowman) wrote in your catalogue."

(Mrs.) MYRA D. PATERSON.

ON CAPE COD 15 YEARS

"Please send me your latest catalogs and price list.

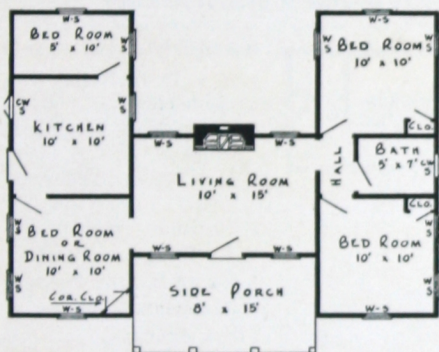

"About fifteen years ago I purchased one of your camp houses, for use on Cape Cod. It has stood there ever since, exposed to all extremes of wind and weather, receiving no attention except a coat of paint seven years ago.

"It has never leaked a drop and is as good and substantial as the day it was set up."

Hodgson Camp House Construction

All prices are in the back of the catalog

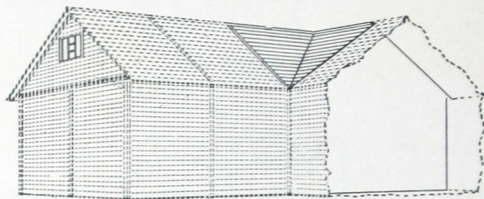

A 10 x 10 ft. house with ends. To this can be added more units with partitions, doors, windows, etc.

MADE in Units. Easily and quickly increased in size.

With 40 years' experience in making unit built houses, we know that these Camp Houses are as practical as it is possible to make.

THE FRAMES are of strong Oregon pine and cedar.

THE OUTSIDE COVERING is of enduring cedar, which will last a lifetime.

A valley roof section to turn the units a quarter turn

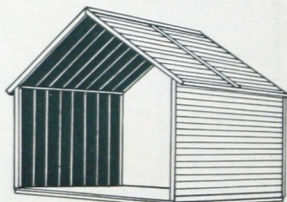

THE EXTERIOR WOODWORK is dipped in tanks of linseed oil before being made up into sections.

ALL OUTSIDE NAILS are hot dipped galvanized and the hardware is either brass or cadmium plated, thus preventing rust.

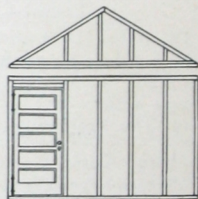

SECTIONS are bolted together with our special WEDGE KEY BOLTS, an invention of ours dating back 35 years. We are using thousands of these each year, saving our customers much expense in the erection of our buildings.

Our Wedge Key Bolts that make the houses go up like magic

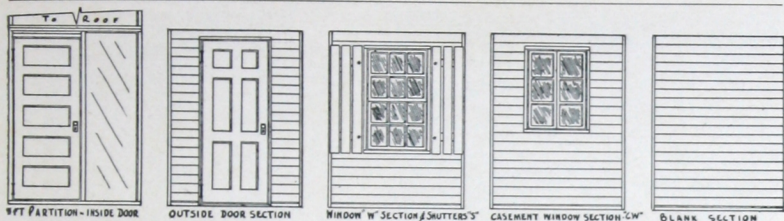

A 5 x 10 or 10 x 10 additional unit to add to the first unit

A 10 ft. Partition with peak and door

THE INTERIOR is lined with a heavy tan fibre, waterproof and wind-proof, making a very dry camp. The woodwork is stained walnut brown.

These sections are used in making up the side walls and partitions of all our camp houses

PARTITIONS are made up of a cedar frame and covered with Celotex. They are furnished with or without peaks or doors.

THE PANEL DOORS are of the best quality, with good mortised locks.

THE CASEMENT WINDOWS have automatic adjusters and secure locks. Regular double hung windows have locks.

FLOORS, ROOFS, SIDES AND PARTITIONS are all made in sections with doors and windows installed, and are quickly Key Bolted together. A 10 x 10 ft. Camp House can easily be erected in an hour.

There is no Roofing Material to put on after the building is up.

The sections are shipped unpainted, but oiled. We can furnish paint, white or green, or Cabot's outside brown and green stains, which with treated cedar foundation posts are listed in back of catalog.

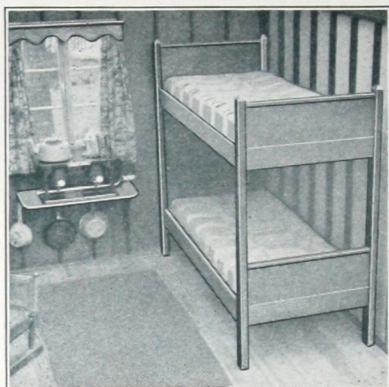

8 x 10 ft. clapboard side porch

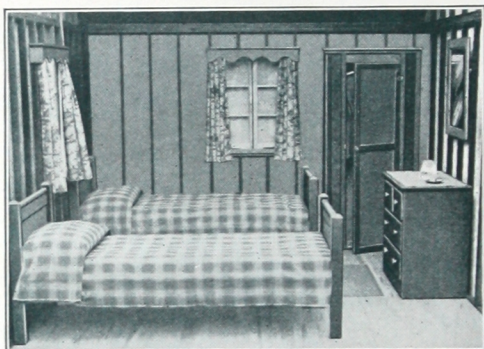

End Porch to go on end of house only. It is 5 x 10 ft. or 10 x 10 ft.

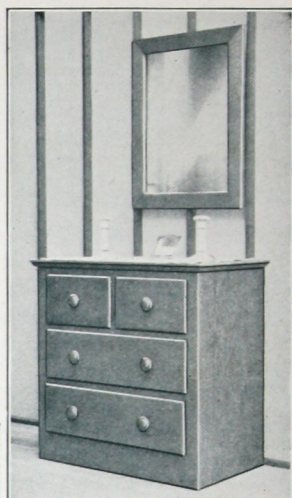

Side Porch to go on side or end of house. It is 4 x 10 ft. with additional 4 x 5 units, or 8 x 10 ft. with additional 5 x 8 ft. units

The Interesting Story of a Unique Business

First factory built in
1892.

FORTY years ago a youngster with an ingenious mind conceived the idea of building small houses in a new way—completely in sections, that could be shipped anywhere, that could be erected by anyone in a few hours' time without the use of nails—simply bolted together.

Soon this ingenious young pioneer, Ernest F. Hodgson, built himself this small factory and equipped it with machinery. Thus was born the business that has grown in these forty years to such tremendous proportions.

This same inventive man, E. F. Hodgson, is still its active head.

Mr. Hodgson at first made small houses for all sorts of purposes—dog houses, poultry houses, tool houses; then one room camp houses, and soon came camps of several rooms.

But it was in the glamorous day of 1900, when that marvelous invention, the "horseless carriage," came into use that the business gained great momentum.

At that time came the demand for "Auto Stables," as they were called. The use of the automobile also brought an in-

Our factory in Dover, Mass., now turning out hundreds of Hodgson Houses each year. Shipped to all parts of the world

In the "Gay Nineties," Hodgson Camp House at Eliot, Maine

creased demand for the Hodgson camp and vacation houses. This demand for garages and camps came from all parts of the country, and indeed from many foreign countries. There are Hodgson houses in South Africa; in Jerusalem; in Greece; in Belgium; in Italy; in South America; in

Nicaragua; in Honolulu; in Newfoundland; Labrador; and other foreign parts.

We know that many of the Camp Houses Mr. Hodgson first built are still in use. The famous actor, Denman Thompson, purchased one in 1905 and erected it in Swanzee, N. H. This house is still in use by his descendants, being in fine condition and bearing silent testimony to the enduring qualities of Mr. Hodgson's ingenious construction.

Another remarkable demonstration of the sturdiness of these houses, is in the one sent to the Grenfell Association at Indian Harbor, Labrador, many years ago. It stands today in a most exposed location, sturdily resisting the severe elements of that bleak coast.

Mr. Hodgson has kept in step with modern progress. Improvements in construction, materials and finish have been constantly made from year to year, so that today our Houses are unique.

Hodgson Camp Houses at the Sportsmen's Show,
Madison Sq. Gardens, New York City, in 1906

The few pictures shown in this article of houses purchased in bygone days have an historical interest and demonstrate the originality of Mr. Hodgson's idea.

The illustrations of the houses being made today demonstrate the continued value of his achievement. These illustrations are from actual photographs, and will give you a very good idea of the appearance of our Camp Houses.

If you can call at one of our salesrooms or outdoor exhibits it will be a pleasure to show you the houses themselves.

Exposed to 4 Days Rain Before Erection

"The camp arrived and was hauled out to the camp site immediately, where it lay flat on the ground for four days, during the hardest rain we have experienced for many months. We were much worried for fear it would be warped, but when it was erected on Sunday it was found to be in practically perfect condition. No special difficulties were found in erecting it, the hardest task, of course, being the setting of the posts.

"Our friends have shown considerable interest in the camp and I have loaned your catalog several times. Will you kindly send me two of your booklets on camp houses. Send to me care of Federal Trade Commission, Washington, D. C."

MRS. C. E. RANDALL.

Perfect After Eleven Years in Northern New Hampshire

"Will you please advise me as to the correct method of taking down one of your cottages which I purchased of you eleven years ago, and which has braved the climate of Northern New Hampshire, with no further attention, all these years, than a new coat of paint on the roof. It really is a most remarkable piece of ingenious workmanship, and I congratulate you.

"Now I wish to remove it to another location." (Miss) MARY C. COLBY,
The Copley-Plaza, Boston, Mass.

This Hodgson Camp of 5 rooms was exhibited at the Sportsman's Show, New York, in 1907 and purchased there by Mrs. Nelson.

After 20 years Mrs. Nelson, who erected this house at Moosehead Lake in 1907, wrote the letter below.

This Hodgson Camp House has many times been buried under six feet of snow.

THE BILTMORE

NEW YORK

JOHN McENTEE BOWMAN

President

PRIVATE OFFICE

E. F. Hodgson Co.,
1108 Commonwealth Avenue,
Boston.

Gentlemen—

"I have often thought that the man who designed and developed the Hodgson House should be decorated as a special benefactor of mankind and had he lived in any other country but America, I believe he would have been.

"I have been using the Hodgson Houses for years, both in Maine and in Westchester County and each Spring I marvel how they have withstood the blasting winters they have gone through. Each one in particular seems to defy the elements and when you realize that both of these climates are very hard during the winter months, and that after many years not even a stain of melting snow has come through, you can realize how well they are constructed and put together.

"One house in particular has been used by me for over several years, part of that time as a playhouse for my little girl, but it became too small for her so I purchased a larger Hodgson House for her and turned the other one over for a tool house and there it will probably stay doing good service and no doubt outlast both the gardner and myself.

"I have also used these houses at Goldens Bridge and I am now erecting them at Stone Hedge. I do not know just how they were developed but I will say that they are the nearest thing to perfection in their line, or the nearest thing to 100 per cent plus that I know of."

Very truly yours,

JOHN McENTEE BOWMAN.
